

European Union Regulation (EC) No. 1907/2006 concerning the Registration, Evaluation, Authorisation and restriction of Chemicals (REACH)

Jubilee Clips Ltd is a producer of fasteners. Our finished product does not release or expel chemicals. We are therefore classifying our business, according to the REACH Regulations as a, "Downstream User," and classifying our produce as, "Articles." We accept our responsibility in the context of REACH to communicate with our customers and suppliers in order to clarify their classification within the regulations. A procedure is in place to contact customers and suppliers and all information will be stored on our system.

Regarding the registration of producers and importers of substances, we will punctually attend to our duty. We will put all efforts into the registration of our applications and therewith secure the availability of the products we require for processing.

Substances in the articles we supply to you and which require registration have been registered, either by us or by our suppliers. We intend to meet all of our obligations under REACH during the registration period 2007 to 2010, and for later periods where applicable.

You, also as our downstream user, are involved in the lifecycle of the media contained in our products. The use of substances in our products must be considered as applications where registering. As soon as we or producers or importers require further information on your applications we will give you notice.

Please contact us anytime if further information on REACH is required.
